

# CSA0918 - JAVA PROGRAMING

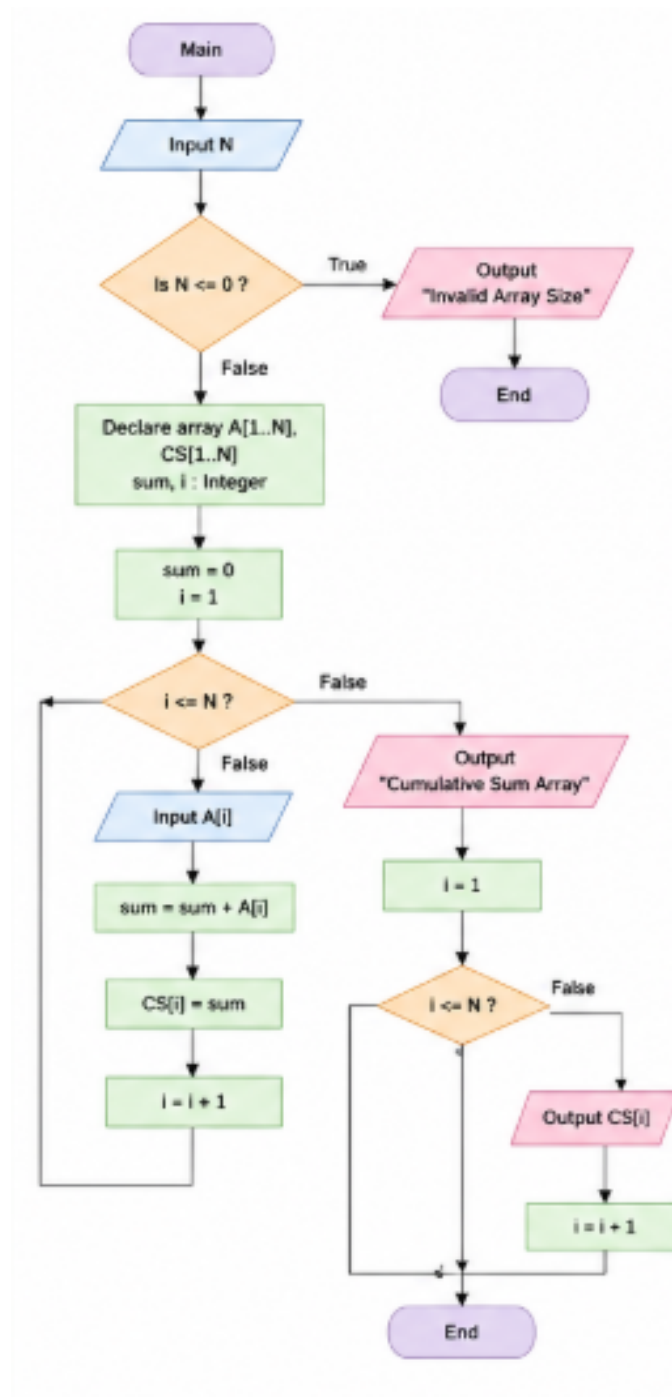

## CO1-AT2

Preethika M (192421084)

1. Read the ages of three siblings and display the oldest and youngest, including a message when any ages are equal.

**2. Read N integers and display cumulative sums in a second Array.**

3. Create a function `gradePoint(mark)` and use it to calculate the average grade point for an array of marks.
